What is ArtMET?

Crosstown established ArtMET to highlight its custom, ‘creative visual’ offerings that require industrial-level production.

What's Different?

Although these assemblies are unique, all ArtMET is seamlessly arranged, scheduled, and produced at Crosstown operations, along with any on-site installations performed by Crosstown's expert field workforce.

Architectural Metalwork • Large Textured Printing • 3D Cutting

All trademarks, logos, and images are the property of their respective/rightful owners.

Think Creative Metal

Turn Practical . . . Into Provocative

Large Format Printing

ArtMET preps your art, logo or photos for the ink textures in the 2.5D printer software.

Up to 8 x 10 feet • INT/EXT's • Textured

‘Virtually any material; soft – bendable – hard

From **fabrics/canvas** to **steel/plywood**, acrylics, **glass**, or substrates such as **Alucobond**, your textured art can be **opaque**, **translucent** and even on fully **transparent**. There's also a **roller option** for large format **wall paper** or **poster** needs.

NOTE: All photos are of actual reproductions from this 2.5D printer.

ArtMET[®] Textured 2.5D Wizardry

ArtMET Client Print Tests > Meticulous Evaluation > Textures That ...Wow!

As artwork, wall panels, or entire murals ... astound your visitors.

It's Endless Possibilities

On stainless steel, glass, mirrors – anything – up to 8 x 10 feet.

Printing Revolutionized

Whatever you imagine, on any material ... ArtMET can print it.

Imagination Gone Wild

Modern Ridged Designs

On ArtMET 3D Cuttings

Glossy Metal Looks

Clear Stained Glass

Backlit Acrylics

Unique Display Systems

The options are infinite.

3-Dimensional Cutting

NOTE: All photos are of actual 3D cuts from this 3D cutter.

ArtMET can 3D cut essentially any material for whatever your visual desires. Up to 6.5 x 20 feet in width/length, spacious, with 5-axis cuts to 1-inch deep.

It's Another Dimension

Create small ornaments, models, wall fixtures and decorations - interior or exterior. Strategically use lighting to highlight your unique presentations.

Or, go big with...

COMMERCIAL

Envision anything and get it 3D cut.

ArtMET Commercial

ArtMET produces custom combinations of architectural metal, 2.5D printing, 3D cutting, or any other client desires.

ArtMET Commercial offers a new, expanding line of straight forward 'turn-key' wall and ceiling products.

— *Some popular options* —

Aluminum

Steel

Sound Baffles

Polygon Pods

ArtMET Commercial products include custom choices.

COMMERCIAL

Light Aluminum Panels

Simple Wall Rails

Easy Assembly

Choose colours or supply graphic art. Quick install/mounting.

Steel Panels - That 'Industrial' Look

In any colours or your graphic designs.

There's a reason why top-name entities utilize ArtMET. From the highest-quality materials, local artisan-labour workmanship to endless custom options backed by professional personal service – ArtMET delivers.

Take creative control - and flexibility - of your wall presentations.

Acoustic Sound Baffles

*Simply Stylish
And Effective*

For Ceilings
Or Walls

ArtMET's perforated **metal baffles** fully capture sound wave energy before it echos off flat, hard surfaces.

A specially designed **sound-absorbing insulation** is installed into the interior of each member. Sets are finished with smooth, non-perforated end-cap slats.

In Classic Dark Or Custom Colours

Low to even high-pitch frequencies are dramatically diminished.

COMMERCIAL

Polygon Pods

*ArtMET's six-sided 'honeycomb-shaped'
Polygon Pods can be up to nine feet in diameter.*

Crosstown can assist in designing individual Pod placements or in creative clusters to meet your needs.

Ceiling acoustics can include strategically dispersed 'traps,' where sound waves easily enter, yet only a fraction escape.

ArtMET Pods **boldly** upgrade a space *above* with an **improved** sound environment *below*.

Multiple colour options for Pod slats and trims are available.

COMMERCIAL

Architectural Metalwork Enquiries

Contact Crosstown. A clear, pragmatic plan will be personally tailored to your needs. You can also request the Architectural Metal Brochure.

2.5D Textured Printing Samples

Contact Crosstown. Send a photo, graphic, company logo, or a copyright-cleared stock file - CMYK, up to 1440 dpi, no matter how large the file size. A high-resolution PDF or master graphics file with layers is preferred.

3D or Laser Cut Samples

Contact Crosstown. 'Arrange a possible 3D or Laser cut sample.

Projects inherently include tests for clients. 'Pre-project' samples are usually small and may include the ArtMET logo.

Need a Quote?

Contact Crosstown. Tour the facility, where you can explore the creativity by seeing and touching an extensive array of samples.

*ArtMet is proudly dedicated to
"Integrity and Results."*

ArtMET is in demand; therefore, having your project scheduled early ensures accomplishing your desired completion dates.
